

ACRISURE STADIUM (HEINZ FIELD)

PITTSBURGH, PA

On the banks of the Allegheny River across from the expansive and scenic Pittsburgh skyline sits Acrisure Stadium (formerly known as Heinz Field), one of the best stadiums in the NFL.

Acrisure Stadium is in the shape of a horseshoe, with the south end open, providing views of the downtown Pittsburgh skyline. Two, three tiered grandstands are located on both sides of the field, with the lower deck circling the entire field. A section of bleacher seats are located on a second deck on the north side of Acrisure Stadium. The stadium has a capacity of 65,500 that includes 7,000 club seats and 120 luxury suites.

The stadium was designed with the city of Pittsburgh's history of steel production in mind, which led to the inclusion of 12,000 tons of steel into the design.
