

UPMC VISION & REHABILITATION TOWER

PITTSBURGH, PA

The new UPMC Mercy Vision and Rehabilitation Hospital will offer advanced vision care, and physical medicine and rehabilitation services. The facility is 442,000 square feet / 10-story which will include approximately 91,000 square feet of lab and research space, as well as outpatient clinical labs, surgery suites and Neural engineering lab.

Additionally, an art gallery and exhibit space are included in the design for the education and enjoyment of the patients and their families. The project also includes a 470,000 square feet/1,040-space parking garage below and adjacent to the new tower.
